## EDUCATION:

### University of Illinois Urbana-Champaign

Master of Computer Science, Specialization in Data Science | Expected May 2028 | GPA: 4.00/4.00

### University of Wisconsin-Milwaukee

B.S. in Computer Engineering | December 2024 | GPA: 3.92/4.00

Dean's List: Spring 2023, Fall 2023, Fall 2024

## TECHNICAL SKILLS:

- **Programming Languages:** Python, Java, SQL, JavaScript, HTML5, CSS
- **Data Analysis & Visualization:** pandas, NumPy, Excel, Tableau, D3.js, OpenRefine
- **Databases:** MySQL, SQLite, BigQuery
- **Developer Tools:** GitHub, VS Code, Eclipse IDE, Jupyter Notebook, GitHub Pages

## PROJECTS:

### Chicago Food Inspection Data Cleaning Project | Python, SQL, OpenRefine | 2026

- Cleaned and standardized a large public food inspection dataset using Python, SQL, and OpenRefine.
- Applied data validation, duplicate detection, normalization, and integrity checks to improve data quality.
- Automated data cleaning workflows and documented transformation steps for reproducibility.

### Wealth & Human Development Dashboard | Tableau | 2026

- Developed an interactive Tableau dashboard analyzing UNDP Human Development indicators data (2013–2023) across 190+ countries.
- Aggregated data to explore relationships between income, education, life expectancy, and HDI.
- Designed an interactive Tableau dashboard featuring scatter plots, maps, tooltips, and bi-directional cross-filtering.

### AI Usage Narrative Visualization | HTML5, CSS, D3.js, JavaScript | 2026

- Built an interactive narrative visualization exploring relationships between AI usage, dependency, burnout, and skill retention.
- Designed linked visualizations with interactive filtering and annotations using D3.js.
- Communicated analytical insights through storytelling and user-driven exploration.

### Banking Management System | Python, MySQL | 2025

- Built a console-based banking application using Python and MySQL to manage customer accounts and financial transactions.
- Implemented database-driven CRUD functionality, input validation, and business rules for deposits, withdrawals, and account lifecycle management.
- Designed a normalized relational database using foreign keys and transaction logging to ensure data consistency and support account auditing.

## **Vegetable Market Management System | Python, Tkinter, MySQL | 2025**

- Developed a desktop inventory management application using Python, Tkinter, and MySQL to manage vegetables, suppliers, customers, and sales transactions.
- Implemented CRUD functionality, database integration, and automated transaction logging to maintain accurate inventory and purchase records.
- Built a modular application architecture supporting persistent storage, input validation, and efficient navigation between application views.

## **TA Scheduling Web Application | Django, Python, HTML, CSS, JavaScript | 2024**

- Developed a full-stack web application for managing university teaching assistant scheduling and course assignments.
- Implemented role-based authentication, CRUD functionality, and relational database integration using Django.
- Collaborated within an Agile team using Git while writing unit and integration tests to improve application reliability.

## **WORK EXPERIENCE:**

### **We Care Family Services LLC — Milwaukee, WI**

#### **Operations & Billing Analyst | Nov 2022 – Present**

- Analyzed monthly and annual billing records to verify accuracy and support financial reporting.
- Cleaned, organized, and validated operational data using Microsoft Excel and Python to improve data quality and reporting accuracy.
- Managed employee scheduling and assigned cases to them
- Prepared detailed reports and maintained documentation to support internal operations.

## **CERTIFICATIONS:**

- Google Data Analytics Professional Certificate — Google (2026)
- Python 3 Programming Specialization — University of Michigan (2025)
- Python for Everybody Specialization — University of Michigan (2025)
- Mathematics for Machine Learning Specialization — Imperial College London (2025)
